

# CENTURION

Wood Burning Fireplace

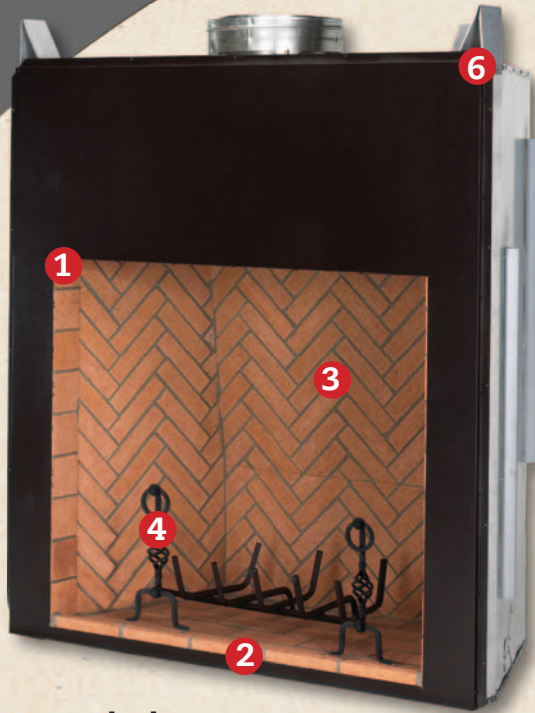

Superior design, performance & features together with true, wood burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

# INNOVATION ON FIRE

It isn't often a product line offers looks, features, performance and quality at a level to lead an entire industry in virtually every category. Design Dynamics™ presents the new Centurion Wood Burning Fireplace; The most innovative, traditional certified masonry fireplace design ever produced, featuring patent pending technology and award-winning design innovation..

The Centurion's unique masonry design features the tallest opening of any certified woodburning fireplace.

## Dramatic Beauty

The Centurion is unquestionably the most dramatic, most impressive certified woodburning fireplace in the business. 48" wide, and an astounding 42" tall, but with one feature perhaps even more impressive: a hearth floor only 1 ½ inches above the ground. In true Rumford style, it also features a slanted back to reflect radiant heat into the room. The Centurion's patent pending Mosaic Masonry™ firebrick kit is a complete, easy to install masonry system designed in a rich, herringbone brick pattern. The kit includes factory installed templates, precut and labeled bricks, and even a bag of hi-temp mortar to grout the finished fireplace.

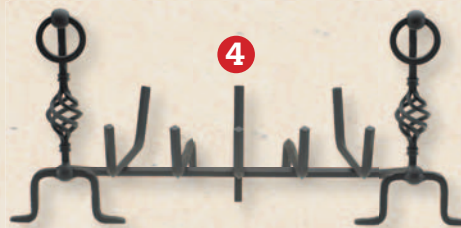

## Standard Features:

- 1 48" x 42" Clear Opening.
- 2 Flush Hearth, Masonry Design.
- 3 Custom Herringbone Brick Pattern with Slant Back.
- 4 Solid Steel Grate with Hand-forged Andirons.
- 5 Left & Right Side Gas Line Knockouts
- 6 Continuous Nailing Flanges and Drywall Stops.
- 7 Design Certification (UL 127)
- 8 Full Insulation.

The patent pending Mosaic Masonry™ real firebrick lining kits are available in Warm Red and Ivory. The installed system is indistinguishable from site-built masonry.

## Absolute Quality

On top of its authentic, site-built masonry appearance, the Centurion is a UL 127 lab tested and certified "zero clearance" fireplace utilizing steel chassis construction. This means flexible and reliable installation options, and guaranteed quality and performance. It is fully insulated and features a traditional, masonry style smoke closet above the damper for optimum combustion air flow. Venting is 12" (i.d.) Class A rated chimney.

Standard features include solid steel, hand-forged log grates. Not some cheap cast import.

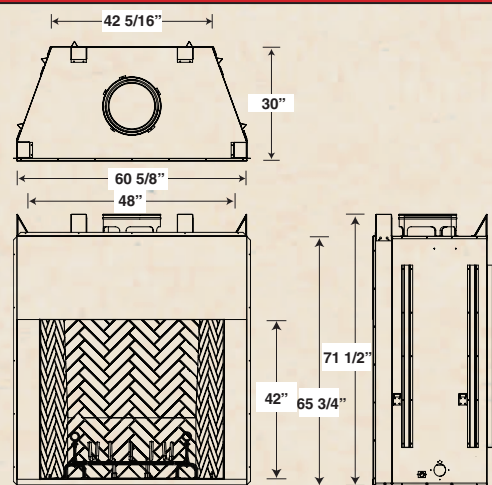

## Convenient & Solid Installation

Nailing flanges and drywall stops all around the face frame provide solid and convenient installation, and includes a tough, textured powder coat finish. We've included gas knockout locations on both sides for convenient addition of a log-lighter or gas log set.

## Accessories

- Masonry Wood Storage Nooks
- Custom Fit, Pre-cast Concrete Mantles
- Extruded Aluminum, Custom Anodized Bi-Fold Glass Door Systems (Ebony, Pewter & Oiled Bronze)
- Gas Log Kits and Accessories

## Dimensions
