

Charred Styles

VENTED GAS LOGS

Hargrove's Charred Style log sets bring realism to your hearth with our lovely bark detail, smoky charring and natural log stacks. Hargrove's vented log sets use our unique Pedestal grate system and are designed to work with any of our standard burner systems, the Ember Burner, H-Burner or System Four. Choose the log model you prefer and the burner system that best fits your needs.

Blazing Pecan

features deep bark and lots of natural char textures with unique, partially burned one-piece front logs, creating the look of a less mature fire, and larger charred top twigs to add rugged realism.

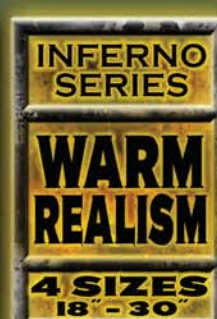

- One-piece charred front log
- See-Thru models available
- Natural gas and liquid propane applications

Canyon Wildfire

is the perfect log set to bring everyone together around the fireplace again. Imagine the feeling of an inviting campfire where friends and family gather to share precious times. Canyon Wildfire's attractive flames and hand-crafted logs create a realistic campfire appearance in your own fireplace.

- Campfire charm featuring bark texture with hand painted charred and peeled bark accents
- See-Thru models available
- Natural gas and liquid propane

Inferno Series

is designed to fit compact zero-clearance fireplaces. Instead of a nice, neat stack of logs that look "staged", with embers in the center, the Inferno Series has a flame engulfed middle log diagonally across the grate. A large half-burned log chunk is on the front left side, with a more conventional larger log to the rear. Smaller top logs may be arranged as desired to change flame visibility. The result? A fire that doesn't look like it was just lit, the Inferno appears to be a wood fire that's an hour or two old, with flames that are working away on the partially burned logs.

- Low profile
- See-Thru models available
- Natural gas and liquid propane applications

Kiva

sets were designed with the Desert Southwest in mind, with a vertical grate system and log stack that complements the unique characteristics of adobe and Southwestern style fireplaces.

- Unique vertical stack
- Designed for Kiwa Burner system
- Natural gas and liquid propane applications

Charred Styles

VENTED GAS LOGS

Magnificent Inferno is defined by large two-piece front logs that create an impressive flame/ember viewing area. Thick bark texture and a detailed burned through area add to the realism. The top logs are a combination of charred logs and Western Pine split logs. The result is a fire that appears an hour or two old, with new wood just added - Hargrove realism!

- Brilliant flame patterns
- See-Thru models available
- Natural gas and liquid propane applications

Supreme Ponderosa is a massive gas log set series designed for larger fireplaces. The rich texture and beautiful hand-painted quality of the split and full bark logs look great in both single-sided and see-thru applications. Beautiful flame patterns and an impressive ember bed make this set so real you'll want to enjoy it time and time again.

- Massive 2 pc. front log and peeled bark areas
- Fits standard depth burner systems for shallower fireplaces
- See-Thru models available
- Natural gas and liquid propane applications

Twilight Inferno offers a combination of features designed to make this vented gas log set easily adaptable to your fireplace. The positions of the two front logs are adjustable; to allow the creation of a custom tailored fit. By using Hargrove's unique black embers, you also have control of the flame pattern and the ember bed in the visible area. Because you "build" this set yourself, the result is a fire that looks the same as one you would build with real wood - the way you want it to look.

- Beautiful combination split detail and charring
- See-Thru models available
- Natural gas and liquid propane applications

Olde World Basket fills your home with European charm. Offered with detailed logs, or warm, glowing coals, it's perfect for small fireplaces (at only 19" wide). Olde World Baskets also feature hidden controls, and beautiful flames from very little fuel (thanks to its efficient burner).

- Designed for small fireplaces
- See-Thru models available
- Natural gas and liquid propane applications
