

Vent-Free Series

Highland Glow

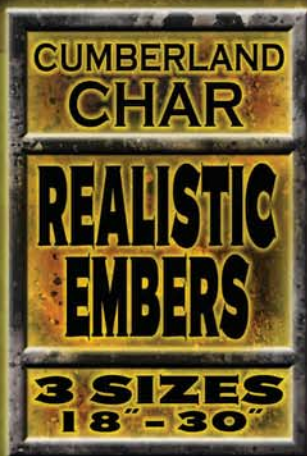

Highland Glow is dual certified for vent-free and vented operation. Highland Glow's compact burner design is available in both manual and remote control models. Hargrove's combination of ceramic fiber and refractory logs provide beautiful fine detail and a realistic glow to the front log and ember bed. The warmth and radiance of the Highland Glow will add natural beauty and comfort to your home.

- Glowing front log
- Vent-free or vented operation
- Natural gas and liquid propane applications

Vent-Free Series

Cumberland Char

Cumberland Char features wonderfully detailed refractory logs to create its unmatched beauty and realism. The new Ember-Trio burner system efficiently delivers natural flame patterns, warm radiant heat and impressive glowing embers. Cumberland Char is available in 18", 24" and 30" sizes, with a manually operated safety pilot control or the convenient variable flame height control system, for both natural gas and liquid propane applications.

- Larger ember bed
- Vent-free or vented operation
- Premium series
- Natural gas and liquid propane applications
