Savannah WINDSOR

36" Multi-View Woodburning Fireplaces

Ultimate Blend of
Features and
Flexibility

Stylish extras for homeowners...Better value for builders

FIREPLACES
FOR BUILDERS
Fmi

Timeless Beauty— Unlimited Possibilities

Woodburning ambiance is the standard all fireplaces are judged by, and Fmi's line of woodburning fireplaces are the standard of the industry. When architecture demands something creative, we're ready then, too. See thru, left or right corner models, peninsula... whatever the job requires, Fmi has the perfect fireplace.

Choices:

- The Inglenook and Enticer corner models are available in both left and right side open versions and offer space saving design to accommodate any open cornered wall. The Enticer is clean faced, while the Inglenook is a louvered circulating unit that accepts the optional fan kit.

The Monterey peninsula fireplace offers a wide open viewing area from 3 sides.

Inglenook and Enticer corner models are offered in left or right open versions, and either circulating or clean-faced.

- Fmi also offers two see-thru models. The Windsor and Savannah are both smooth-faced, and share the same hearth area dimensions, however the Windsor utilizes space saving 8" venting while the Savannah uses the more free-flowing 12" system.

- The Monterey is Fmi's large peninsula model featuring openings on three sides. It is also smooth faced and requires 12" chimney for optimum performance.

Builder Benefits:

- All Fmi woodburning fireplaces feature built-in value and quality standard features for builders including textured charcoal powdercoat finish, quality refractory brick liners, wire mesh firescreens and a pre-wired electrical junction box on air circulating models ready to accept optional heat blowers and other accessories.
