

FIREPLACE

PRODUCT GUIDE

napoleonfireplaces.com

The cover features a dark background with vibrant orange and yellow flames rising from the top corners. The word "FIREPLACE" is written vertically in white, and "PRODUCT GUIDE" is written in large, bold, white capital letters to its right.

FIREPLACE PRODUCT GUIDE

A Fireplace for Every Room

A Napoleon® fireplace adds value to your home while at the same time giving you uncompromising comfort and a reliable heating source. The perfect accent for bedrooms, bathrooms, kitchens, entrance ways, offices, bars, lounges, living rooms and waiting rooms. A Napoleon® fireplace adds the most return for your home investment. A fireplace for every room.

Outstanding Reliable Warranty

Each and every Napoleon® fireplace is designed and manufactured to strict quality testing standards and backed by the President's Limited Lifetime Warranty, guaranteed to give you the peace of mind you deserve. (Registered under the world recognized ISO 9001-2008)

Zone Heating

Why is a fireplace more effective than using the furnace alone?

Zone Heating means you are heating the room that you use the most with an alternate heat source, like a Napoleon® Fireplace. Zone Heating is the obvious solution for families concerned about rising fuel costs.

With Napoleon®, all of our heater rated models are designed to generate the maximum amount of heat available for your fuel dollars. Napoleon® fireplaces not only radiate heat through their glass doors, they simultaneously conduct heat through the firebox (in some models through their heat exchanger).

No Power. . . No Problem!

Weather out the storm in the comfort of your own home! Napoleon® gas burning and wood burning fireplaces, stoves and inserts help you during power outages. Napoleon® gas burning products require no electricity to light or operate. With a built-in millivolt system you can ensure reliability even when the power is out. Napoleon® wood burning products double as a reliable cooking source, transferring heat directly to your pot or frying pan. Rest assured, you can stay safe, warm and cozy while the power is out with a Napoleon® fireplace product!

THE NEXT GENERATION OF FIREPLACE DESIGN

Napoleon's Fireplace Design Studio (FDS) allows you to design and visualize the perfect fireplace for your home! It's easy, it's fun and you can upload a picture of your room to see exactly how it will look. Try it out now at napoleonfireplaces.com/FDS. Also available as an iPhone App.

Gas Fireplaces

Napoleon® fireplaces are designed to provide you absolute comfort and control at the touch of your fingertips. When you install a Napoleon® gas fireplace you can rest assured that you will enjoy a lifetime of instant comfort with reliable performance year after year. Choose a fireplace with the knowledge that Napoleon® gas fireplaces achieve some of the highest heater rating efficiencies on the market.

- Three built-in models to choose from, WF6, WF9 (WF9ST, See Thru shown in room set above) and WF18
- Exclusive Napoleon® NIGHT LIGHT™ radiates a warm glow to the room even when the waterfall is off
- Holds two gallons of water for decreased refill times or can be hard piped

The Green Choice

Heating your home with a Napoleon® high efficiency, EPA (Environmental Protection Agency) approved fireplace, stove or insert releases no more carbon dioxide than a dying tree would lying on the forest floor. In fact, when the entire carbon cycle is considered, a Napoleon® EPA approved fireplace heats your home more efficiently and with less impact on the environment than any other heating fuel option.

Direct Vent Technology

Napoleon's direct vent fireplaces do not require a chimney and can be vented directly through a wall or roof. The direct vent draws its combustion air from outside while venting to the same outside atmosphere - thereby not consuming warm house air, nor competing with other appliances and furnaces for combustion air. Direct venting also eliminates drafts and heat loss associated with other fireplaces.

The Story

It all started in a small garage just outside Barrie, Ontario, Canada, where Wolfgang Schroeter, trained in a German technical engineering school, built three wood stoves his first year while his wife and partner, Ingrid, would bring home the metal needed on the roof of her car. At that time, no one could imagine the incredible future that lay ahead for Wolf Steel Ltd. and eventually Napoleon® Fireplaces and Napoleon® Gourmet Grills. By 1981, the name “Napoleon” was born. Over the years, the demand for Napoleon® products grew beyond Ontario’s borders to the rest of Canada and eventually into the United States, United Kingdom, Europe and Asia. Napoleon® is an ISO9001 - 2008 registered company and now operates with 750,000+ square feet of manufacturing space and over 750 associates. Wolf Steel’s ownership now reflects two generations of the Schroeter family’s high standards of quality, performance and commitment to pursuing cutting edge design and providing consumers with true ‘value’ they expect for their investment. Each family member is involved in the day-to-day functions of all operations. The high degree of continuity and stability guaranteed by the Schroeter family, combined with an uncompromising customer focus, innovative strength and good branding, are responsible for this success.
