CTL-58 & CML-58

Wide-View Direct Vent Fireplaces

### *CML-58 with Accent Decorative Front*

Simple yet elegant, the Accent Front makes a clean transition from the fireplace to your surrounding wall. Shown in Mahogany.

### *CML-58 Contemporary Wide-view Fireplace*

The contemporary wide-view fireplace puts the "art" in "hearth". With reflective glass "logs" lit up from below, and a mirrored firebox, you'll enjoy endless iterations of the flames or lights throughout the year.

And with a choice of media colors to accent the fireplace (shown at right from top to bottom - H2O, Mercury and Tequila), you can add just the right look to reflect your taste.

## CTL-58 Transitional Wide-view Fireplace

The transitional wide-view fireplace works across a broad spectrum of home décor, taking a traditional burning log fire and spreading it across the entire viewing area. Locate it on the floor or higher on the wall to create just the right focal point for your room.

## Decorative Fronts

More than just a simple frame, our decorative fronts provide the perfect exclamation point to the fireplace, as well as your room.

The Accent front is simple yet elegant with soft lines to complement the fireplace.

The Inspiration and Eminence fronts go well beyond - they each incorporate standard Moonbeam™ LED lights that not only enhance the look of your hearth year-round, but also highlight the walls around your fireplace.

It doesn't matter if your décor is contemporary or more transitional, the Moonbeam™ accent lights beautifully highlight the surrounding wall and help enhance the room in a subtle manner.
