LIMITED EDITION

the brilliant story

The perfect marriage of Swarovski and Napoleon® brings you a truly remarkable fireplace experience.

Napoleon's LHD50SS Limited Edition gas fireplace comes complete with a bed of precision-cut crystals, made with SWAROVSKI ELEMENTS. With Napoleon's exclusive CRYSTALITES™, the light brilliantly reflects in every direction. The results captivate, thrill and create the desire for absolute elegance.

It all began in 1976 when a small steel fabrication business launched by Wolfgang Schroeter started manufacturing steel railings in Barrie, Ontario, Canada. At that time, no one could imagine the incredible future that lay ahead for Wolf Steel Ltd. and eventually Napoleon® Fireplaces and Napoleon® Gourmet Grills. Since the first wood stove rolled off the production line over 30 years ago, Wolf Steel's commitment was to be distinctive and successful in everything they do. The original stove featured a solid cast iron two-door design and was produced in a one thousand square foot manufacturing facility. By 1981, the name "Napoleon®" was born and with it, the first single glass door with Pyroceram high temperature ceramic glass — a first in the industry. This was the first of many milestones for Wolf Steel™ and over the next few years, the demand for Napoleon's wood stoves grew beyond Ontario's borders to the rest of Canada, the United States, Europe, United Kingdom and Asia. Napoleon® is an ISO9001 — 2008 registered company and operates with 750,000+ square feet of manufacturing space and over 500 employees. We are North America's largest privately owned manufacturer of quality wood and gas fireplaces (inserts and stoves), gourmet gas and charcoal grills, outdoor living products and waterfalls.

Timeline: 1862 — Daniel Swarovski — The play of light in crystal must have fascinated Daniel Swarovski from early childhood. He was born in 1862 in Bohemia where crystal defined life in his parents' house. Bohemia, at that time part of the Austro-Hungarian Empire, was one of the most important manufacturing centers for glass and crystal. Crystal was also cut in his father's small factory. As a young boy Daniel often watched the work in his father's business. Later he completed his apprenticeship with his father, as well as at several other crystal-cutters. When, at the age of 21, he visited the "1. Elektrische Ausstellung" (First Electrical Exhibition) in Vienna, he had the idea of his life: the new techniques from Siemens and Edison inspired him to develop a machine for cutting crystal. He worked day and night at realizing his vision. Finally, nine years later (1892), he was ready to register a patent: a machine which, for the first time, made it possible to cut crystal to perfection. It was far faster and more precise than the manual work to date. Thus began a new era in the world of crystal. The foundations had been laid for today's company. Daniel Swarovski together with his brother-in-law Franz Weis and with Armand Kosmann founded it in 1895.
